

MORE THAN 18,000 CHILDREN AND YOUTH ARE DIAGNOSED WITH DYSLEXIA AND OTHER LEARNING CHALLENGES.

Learning disabilities can affect how children and adults think, remember, process, and learn information. Speech-language pathologists help people with learning disabilities to improve these important skills through specialized intervention. You can help someone you know by reading together and talking about the who, what, and why of the story or by writing online messages to friends and family.

If you or a loved one is experiencing learning difficulties, visit [bcaslpa.ca](http://bcaslpa.ca) to find out more about speech-language pathology and audiology services.
