

... YOU KNOW? ...

MORE THAN 100,000 CANADIANS
LIVE WITH APHASIA
(DIFFICULTY SPEAKING, READING,
AND UNDERSTANDING LANGUAGE)

Aphasia is caused by brain injury, and, while 1 in 3 stroke survivors are diagnosed with aphasia, few Canadians know what it is.

Speech-language pathologists (SLPs) help people with this condition to understand and communicate with others.

For more information, or to find a speech-language pathologist near you, visit www.bcaslpa.ca
