

*“I’m fine:
I don’t need
my hearing
loss tested.”*

Don’t put yourself at risk.

Untreated hearing loss can increase your risk of dementia, falls, hospitalizations and poor overall physical and mental health.

Speak to an audiologist about how you can treat your hearing loss in a way that suits both your hearing and your budget.

For further information, or to find an audiologist near you, visit speechandhearingbc.ca.
